

## OUR EMPLOYER PARTNERS:

We partner with local employers to offer work experience placements, enabling women to put what they're learning into practice and gain valuable insight into the world of work.

Work placements are in a range of settings and can be arranged to align with women's hopes for their future.

Women can select one of our resident work placements or if they have a specific goal we will approach a business or organisation specially.

“

**The best decision I ever made was joining the employability programme. No exaggeration, it's changed my life!**

## WHAT IS GIFTED WOMEN?

Gifted Women is a charity helping women to build employability skills and enter the world of work.

We exist for women who have experienced barriers in life such as substance misuse, homelessness, contact with the criminal justice system and domestic abuse.

Our programme has a trauma-informed approach and community focus, with lots of opportunity to build confidence and socialise.

APPROACH**

## THE GIFTED WOMEN JOURNEY:

### WEEKLY SOCIAL GROUP

Women can build confidence and warm up to our employability programme with a fun weekly social group.

### 12 WEEK EMPLOYABILITY COURSE

A nurturing space to build employability skills together with a group of women with similar life experiences.

### 1:1 SUPPORT WITH GOAL SETTING

Together we will look at women's hopes for the future and make a plan with small, manageable steps to get them there.

### WORK EXPERIENCE PLACEMENT

Women can try out an 8 week placement in a local business or organisation, to build confidence in the workplace.

### SUPPORT FINDING PAID WORK

When women are ready we can support them with finding and sustaining a job. We also support employers to ensure a smooth transition.

We recognise that every woman is unique with different gifts to offer, and different challenges to overcome. We seek to journey with women on their own personal path towards employment, leaving the past behind and building a better future.

**"I feel like I now have a purpose. This process has been very important to me as I had lost the confidence in thinking I could work again".**
